Quick Guide: How to Use Campus Pack Wiki

The Campus Pack wiki is a Canvas tool that enables students to create a series of web pages in which text, images and digital media can be integrated. **Note**: Campus Pack wiki is only available if your instructor has enabled it within your course.

**Add a New Page**
Your instructor may provide you with access to a starting page, or you may need to “Add a New Page” to develop the wiki.

1. Click the “Add a New Page” button on the right-hand side of the Wiki space to add content.

2. Enter a title for the new page, and click the “Continue” button.

**Enter and Edit Text**
You can type text into the page directly. Or, you can copy and paste from a word processed document. In this case, some text formatting will be lost and you can use the editing toolbar to manage text and paragraph layout.
Embed an Image or Video

1. Click on the **image** (tree) icon to embed an image or the **media** (filmstrip) icon to embed a video. A new window will pop up.

2. To embed a video from your local computer, click the **Browse** icon and search for the file.

3. To embed a video from the web, copy the URL of the video from the browser, and paste it in the “File:URL” field. The dimensions and type will change automatically.

4. Click anywhere in the white box to preview the video. Click the **Insert** button at the bottom to embed the video in the page.
Link to a Page

1. As you build a wiki site, you might want to build links between the pages. Select text that will serve as a link, then click on the hyperlink icon in the bottom left of the toolbar to enter a link to an external URL or to another page in the wiki.

2. Click the bubble next to the “Link to an existing page,” then click on the page to which you would like to link. Click the “Insert” button.
