Quick Guide: How to View Instructor Comments in Grades

There are several ways that students can be alerted about the availability of feedback on Assignments in Canvas.

1. The **Recent Feedback** column on the course home page displays the grade and preview of the comment the instructor has provided for the student.

2. Clicking on the assignment name shows the submission details and gives the student a chance to add a comment as well. If it was not submitted online, the words **No Submission** will be shown.

3. Students will also be notified of feedback in their Canvas **Inbox**. A message from the instructor is sent out automatically, and it displays both the grade and comment.
4. Instructors can also provide feedback to students on their uploaded submissions using “Crocodoc”.

5. To view this feedback, click on the assignment link in the Grades view, then click on the “Preview the Document” icon in the Submission Details window.
